Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 21, 2007 has been entered.
2. An amendment was received from the applicant on February 21, 2007.
3. Claims 1-14 have been canceled.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Lane (US 4,756,265).

Lane discloses the same planing watercraft as claimed, as shown in Figures 16-21, said watercraft being comprised of a planing hull, as shown in Figure 16, in

combination with a single lifting device, defined as Part #240, that is constrained to said watercraft at a predetermined distance from the bottom of said hull, as shown in Figure 17, said device being further comprised of at least one transversal element, defined as Part #246, with an upper surface that faces said bottom of said hull and a lower surface opposite said upper surface, as shown in Figure 16, said transversal element being subject to a lifting force that is perpendicular to said lower surface, where said transversal element is arranged below the bottom of said hull at or near the barycenter of said watercraft, as shown in Figure 16, and where said watercraft during operation has one portion of the bottom of said hull in water while being sustained partially by said portion of said bottom, and partially by said device.

Response to Arguments

6. Applicant's arguments with respect to claim 15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nozaki (US 6,782,839) discloses a planing watercraft with a single lifting device mounted to a bottom surface of a hull near the barycenter of said hull. Rethorst (US 5,582,123) discloses a surfing ship with a single lifting device mounted at a bottom of a hull near the barycenter of said hull.
